## Evaluation Report – 2nd Transnational Project Meeting (Germany)

- Project: Water Skyball in Europe – Training of Trainers (WSB in EU – ToT)
- Project Number: 101134194
- Event: 2nd Transnational Project Meeting with Practical Educational Events and Amateur WSB Championship
- Venue: Germany
- Date: 2024

### **Summary:**

The second Transnational Project Meeting was successfully held in Germany, focusing on the further development of Water Skyball coaching competencies and practical applications of the sport in different environments. The event built on the achievements of the first meeting in Hungary and provided an opportunity for partners to deepen their professional collaboration.

### **Key Results:**

- Participants improved their coaching skills and shared best practices for training delivery.
- Practical sessions supported knowledge transfer and adaptation of training materials to local needs.
- The Amateur Water Skyball Cup demonstrated the sport's inclusiveness and recreational potential.
- Stronger cooperation was established between partner organizations for upcoming project phases.

### **Main Outcomes:**

- Advanced understanding of the Water Skyball methodology.
- Increased motivation among trainers to integrate WSB activities into their national sport programs.
- Strengthened international community and exchange of ideas.

**Conclusion:**

The meeting achieved all of its objectives by combining professional training, intercultural exchange, and sport promotion. The event confirmed the growing European interest in Water Skyball and provided a solid base for the next phase of the project.

## Feedback Questionnaire – Summary of Results

### **1. Overall organization of the event:**

Participants appreciated the smooth coordination, good communication, and supportive atmosphere throughout the program.

### **2. Quality of training sessions:**

The practical sessions were well structured and provided valuable hands-on experience for participants. Trainers highlighted the opportunity to test new exercises and share their own methods.

### **3. Relevance of content:**

The training content was considered meaningful and applicable in different sport education settings. The link between theory and practice was clear and well-balanced.

### **4. Professional development:**

Participants felt that the event contributed to their professional growth and to the dissemination of Water Skyball in their countries.

### **5. Logistics and accommodation:**

The organization of the event, including venue, meals, and accommodation, received positive feedback. Minor logistical remarks were mentioned but did not affect the overall positive impression.

### **6. Overall satisfaction:**

Participants described the meeting as inspiring and motivating, underlining the sense of community and the professional level of the activities.

### **7. Comments (summary):**

“Great learning environment and international cooperation.”

“Excellent teamwork and positive atmosphere.”

“The amateur cup was a real highlight and showed the sport’s potential.”

### **Conclusion:**

The feedback confirmed that the German meeting was an important milestone in the project’s implementation. Participants praised the high professional quality, the well-balanced structure, and the enthusiastic collaboration among partners, which all contributed to the success of the event.
